A COLLECTION OF FEATHER LICE (MALLOPHAGA) FROM BIRDS IN ONTARIO

W. W. JUDD

Department of Zoology, University of Western Ontario, London, Ontario

During the spring of 1953 a collection of ectoparasites, removed from birds and mammals, was presented to the Department of Zoology, University of Western Ontario by Dr. J. D. Detwiler. Included in the collection is a series of microscope slide mounts of feather lice (Mallophaga) taken from birds by Mr. Eli Davis, Rural Route No. 7, London, Ontario, during the years 1931 to 1934, mainly in the vicinity of London, Ontario. The slides have been incorporated into the collection of entomological slide mounts in the Department of Zoology, University of Western Ontario and in the following list the slide number is included among the data pertaining to each collection. Identifications of the lice were kindly made by Mr. R. A. Ward, Department of Zoology, University of Chicago.
